

The Cedar Grove Belgium School District is committed to ensuring that our students maintain their health in the school setting. We believe that healthy students have the best chance at being successful in the classroom.

However, there are times when it is essential that your student does not come to school. The following conditions require that your student remain at home.

Your student has an illness that prevents comfortable participation in classroom activities. This includes times, but is not limited to, when your student:

- Is vomiting and/or has diarrhea.

- Is short of breath or is wheezing.

- Has a cough that disrupts normal activity.

- Has distracting pain.

- Has a fever; a temperature greater than 100°F.

- Your student poses a risk of spreading his/her illness to other students.

If your student is not feeling well, your primary care provider is the best person to consult about whether your student should stay home or come to school. Common sense, concern for your student's well-being, and the possibility of infecting classmates should all contribute to the decision about whether or not your student should stay home.
